MATH 5143: Real Analysis
Syllabus

Instructor Contact Information
Instructor: Dr. Anne-Katrin Gallagher
Email: anne-katrin.gallagher@okstate.edu
Office: MSCS 511
Phone Office: 744-1800
Office Hours: M, W 3:30-5:00 pm in MSCS 511, or by appointment

Class & Resource Information
Class Meeting and Location: MWF 10:30am-11:20am in MSCS 509
Online Classroom: https://online.okstate.edu/

Prerequisites: Math 4153/Math 5053 – Advanced Calculus.

Required Materials:
Other resources: Real Analysis by H. L. Royden, Real and Complex Analysis by W. Rudin, Real and Abstract Analysis by E. Hewitt and K. Stromberg, and many more.

Course Information
Content: This course is an introduction to measure theory. It covers
- algebras and sigma algebras of sets, outer measures and the construction of measure by Caratheodory, Lebesgue-Stieltjes measures, Borel sets and measures, product measures, regularity properties of measures, measurable functions,
- construction of the integral with respect to a measure, convergence theorems, in particular: Lebesgue dominated convergence theorem, Fatou’s lemma, monotone convergence theorem, Egorov’s theorem, Lusin’s theorem, and Fubini’s theorem,
- signed measures and the Hahn decomposition, Radon-Nikodym Theorem, Lebesgue decomposition of a measure with respect to another measure, functions of bounded variation, absolutely continuous functions, Lebesgue-Stieltjes integrals.
In particular, Chapters 1-3 of the textbook will be covered.

Expectations: All students are expected to be active participants in class by asking and answering questions. Plan to spend, on average, 15 hours each week outside of class on MATH 5143. This includes reading the text before class, working through your lecture notes after class, working on problems, discussing questions with others, and making use of office hours. Should you miss class, you are responsible for what you missed. Take advantage of my office hours whenever you have questions on the material covered in class, homework etc. If you can’t make it to the office hours, feel free to make an appointment with me and/or email your questions to me.

Missing Work Policy: Your instructor will make reasonable accommodations in the event that you miss an exam for a valid and documented reason, assuming documentation is provided in advance unless absolutely impossible. You will need to notify your instructor as soon as you know there is a conflict with one of the midterm exams or final exam; you will be ineligible for a make-up if you do not.

Determination of Grades
100% ≥ A ≥ 90% > B ≥ 80% > C ≥ 70% > D ≥ 60% > F ≥ 0
MATH 5143: Real Analysis

Syllabus

Homework:
Each Wednesday homework will be assigned, the solutions are to be submitted at the beginning of class on Wednesday of the following week. Each problem should be submitted on a separate page. The top of each page should contain your name, the homework set number and the problem number. Please staple your solutions together after ordering them by problem number.
Only submit neatly written solutions (as you would whenever you present your work to somebody). It usually takes some time to solve these problems, and it usually takes several attempts to find a clear way of presenting a solution.

Suggestions:
Read the text before each lecture. Work through your lecture notes after each lecture. Think about what you learned that day. In particular, make a list of all new definitions, facts and theorems, how they connect and why they make sense and are true.

Exams:
There will be two 50 minute in-class exams, and a comprehensive Final Exam.
- **Exam 1:** Wednesday, September 26, 10:30am-11:20am, in MSCS 509
- **Exam 2:** Wednesday, October 31, 10:30am-11:20am, in MSCS 509
- **Final Exam:** Friday, December 14, 10am-11:50am, in MSCS 509

Academic Integrity & Drops

**Academic Integrity:** Oklahoma State University is committed to the maintenance of the highest standards of integrity and ethical conduct. Please see the OSU Fall 2017 Syllabus Attachment for more information. You are encouraged to work and study together, however all written and online work you submit must be your own. Copying someone else's solutions or letting others copy your work is prohibited. Do not cheat. Violations may subject you to disciplinary action including the following: receiving a failing grade on an assignment, examination, or course, receiving a notation of a violation of academic integrity on your transcript (F!), or being suspended from the University.

**Syllabus Attachment:** Please access and read the OSU syllabus attachment on the web page: [http://academicaffairs.okstate.edu/content/resources-faculty-staff](http://academicaffairs.okstate.edu/content/resources-faculty-staff). Follow the link under Syllabus Attachment for Spring 2017. This document contains important information, including instructions about disability accommodations. Please contact your instructor privately during the first week of the course if you need accommodations as the result of a disability. Any changes to this syllabus will be announced in class and posted on BrightSpace.
