

Instructor: Cynthia Francisco
Office: MSCS 431
Office Hours: TBA
Virtual Office Hours by appointment via Skype or Google Hangouts.

E-mail: cynthia.francisco@okstate.edu
Expected Response Time: You can expect a response from me typically within 24 hours on weekdays and within 48 hours on weekends. For content questions, consider posting on the Facebook group.

TA: Nicki Gaswick
TA Office Hours: Wednesday 3:45-4:45 in the MLSC on the 5th floor of the library

Course Web Page: online.okstate.edu
Our course's homepage is on Brightspace (D2L). Here you will find announcements, content videos, description of weekly homework, and more. You must check this page regularly.

Online Homework: WebAssign: www.webassign.net
Most of your homework will be within the online homework system WebAssign. To register for WebAssign, go to www.webassign.net, and self-enroll. (For more detailed instructions, see the WebAssign Registration handout.) You will need the class key **okstate 1711 8566**. Within 14 days, you'll need to purchase WebAssign access, either directly from the WebAssign website or by purchasing an access code through the OSU Bookstore.
WebAssign Technical Support: 800-955-8275

General Technical Support: OSU IT Help Desk: 405-744-4357 (or Toll-free 1-877-951-4836) or help@okstate.edu

Facebook Group (recommended): There is an optional Facebook group for this course; go to <https://www.facebook.com/groups/Math2103OnlineFall16/> or search for Math 2103 Online Section, Fall 2016. This group is a closed group (searchable, but posts are only seen within the group), but I may change it to a secret group once everyone has had a chance to join (not searchable). **If you are joining with a name other than the name on my roster, please email me so that I can accept your request to join.** Check regularly for help on various questions. I will post help and hints as questions come up. If you can give any input to help your fellow students, please do, but please do not post full solutions. You will often find that you can help each other faster than waiting for me to respond, especially because you will often be working on homework at the same time. **Although there will be a lot of useful course information in the Facebook group, you are still responsible for checking our office course webpage on D2L.**

Course Prerequisites: Grade of C or better in Math 1483 or Math 1513 or Math 1715; or an acceptable placement score (see placement.okstate.edu).

Course Goals: This course is an introduction to calculus with emphasis on applications to business. Calculus is a study of how things change, and we will be applying these ideas directly to realistic business contexts.

Required Textbook Package and Supplies.

- **Textbook Package.** WebAssign access to Applied Calculus (Fifth Edition) by Hughes-Hallett, et al. You can buy a WebAssign code at the OSU bookstore or at www.webassign.net/. WebAssign access includes access to an ebook; you may choose to buy a physical book if you wish.
- **Calculator.** You are required to have a scientific or graphing calculator (TI-83/84 or similar) for this course. You may NOT use a calculator with a QWERTY keyboard, an internet connection, or symbolic manipulation capability. You may check out a TI-83/TI-83 Plus graphing calculator from the Mathematics Department (401 MS) for use during the semester while the supply lasts, if you can come to Stillwater to pick one up; there is NO charge.

What I expect of my students: As students in an online course, you will need to be self-directed enough to keep yourself on schedule with your coursework each week. You should log in several times per week to check for announcements about your weekly assignments. **Weekly assignments will typically be due Thursday night at 11:59 p.m. (Other deadlines will be posted on the webpage.)** I expect that you will use the variety of videos to familiarize yourself with the content for the week before you attempt the relevant WebAssign or written homework assignments. When you have questions, post in the Facebook group, get tutoring through the MLSC (in person or online, see below), attend in-person office hours with the TA or me, or make a virtual appointment.

Interacting with others (tutors, TA, instructors, classmates in the Facebook group or elsewhere) will be a critical tool for learning material in an online course. Start your weekly work early to allow time for such interaction.

What you can expect of me: I will be an active presence on the online course. I will post weekly updates with announcements and an overview of what you will need to do that week. **Weekly updates will typically be posted by Friday afternoon for the upcoming week.** I will regularly monitor the Facebook group; as with email, you can expect responses from me within 24-48 hours, but you can help each other there at any time.

Computer Requirements: To complete the requirements for this course you will need access to a desktop or laptop computer that is equipped with a modern internet browser such as Internet Explorer, Chrome, Firefox, or Safari. You will also need access to a scanner or a camera to create images of your completed written assignments to submit via Dropbox on the D2L site. A cell phone or tablet camera should work as long as the images are clear enough to read all of your work easily. You will need to register immediately for WebAssign to complete homework assignments; see Content: General Course Information on the D2L page.

Course Structure: This course is set up in weekly segments that you will find in the **Content** section of D2L. Under each week, you will see video lectures, links to the WebAssign homework, and descriptions of any written or other assignments. You will submit your written homework in the **Dropbox** section of D2L.

Grading: I will calculate your course grade using the two different schemes below and give you the higher of the two resulting grades.

Scheme 1	
3 hour exams	15% each
Final exam	25%
Homework/other assignments	30%

Scheme 2	
3 hour exams	10% each
Final exam	40%
Homework/other assignments	30%

Earning 90% guarantees an A for the semester, 80% a B, 70% a C, and 60% a D. I reserve the right to use discretion if you are on the borderline between two grades, considering performance on the final exam, improvement or decline during the semester, and my subjective judgment of your effort. I will not drop any exam scores. I will drop your lowest WebAssign score and your lowest written homework score.

Homework: You will do much of your homework in WebAssign, which also gives you access to an online ebook. **All homework deadlines are 11:59 p.m. on the dates listed on the weekly assignments in D2L. You may notice a due date/time a few hours later on WebAssign; I set it a little later (early the next morning) to offer a grace period in case of last-minute issues.** You can submit each problem up to 5 times. Homework will not be available after the due date, so remember to start early. Computer problems or internet issues are not valid reasons for late homework. You will also have regular written homework, which will be assigned on D2L. If you have a question about a homework problem, you can post it on the Facebook group, visit the MLSC, or attend office hours. **Please keep a copy of your written work for every homework assignment so that you can review it later, and so that your instructor can review your work, if necessary.**

Examinations: There will be three one-hour exams and a two-hour cumulative final exam. **Bring your student ID to each examination.** You may use a calculator (see calculator requirements above) and one 3x5 card with anything written on both sides during the exam. All Exams must be proctored and a Proctor Agreement must be on file with the Arts & Sciences Outreach office prior to the first exam. On D2L, see Content: General Course Information for a Proctor Agreement form. *Make-up examinations* will be given only for **serious and unavoidable** conflicts, and *only if* your request for a make-up examination is approved by your instructor **in advance**. If a make-up exam is approved, you will need to make arrangements with me, the Arts & Sciences Outreach Office, and your proctor to accommodate the make-up exam.

Exam Dates: Our exams will be held on the following dates; mark your calendar. Rooms will be announced later.

	OSU Campus (free)	Other Proctoring
Exam 1	Thursday, 9/15, 5:30-6:30pm	Wed. 9/14 or Thurs. 9/15
Exam 2	Thursday, 10/20, 5:30-6:30pm	Wed. 10/19 or Thurs. 10/20
Exam 3	Thursday, 11/17, 5:30-6:30pm	Wed. 11/16 or Thurs. 11/17
Final Exam	Thursday, 12/8, 12:00-1:50pm	Wed. 12/7 or Thurs. 12/8

MLSC: Mathematics Learning Success Center – Free tutoring online and in-person! **Online Tutoring** is available on Tuesdays and Thursdays, 6:00-9:00 p.m. Login details will be posted at <https://math.okstate.edu/16-mlsc/336-online-tutoring>. **If you are on the Stillwater campus**, you can get free walk-in tutoring at the MLSC on the 5th floor of the Edmon Low Library. The hours of operation are Sunday 1pm-9pm, Monday-Thursday 9am-9pm and Friday 9am-5pm. Computers (desktop and laptops) are available there. I highly recommend spending some time each week working on your homework in the MLSC so that you have tutors available as you go. For more information, visit the MLSC website at math.okstate.edu/mlsc, or call 405-744-5818.

Academic Honesty: Don't cheat. Don't copy off of other students, allow other students to copy your work, have someone else do your online work, or present work you find in printed or electronic sources as your own. **You may get help on homework from other people or sources but should write your solutions independently, without looking at anything someone else has produced.** See the OSU Fall 2016 Syllabus Attachment for more information. For questions, contact the Office of Academic Affairs, 101 Whitehurst, (405) 744-5627, <http://academicintegrity.okstate.edu>. I deal with cheating very harshly; don't take any chances.

Special Accommodations for Students: If you have a qualifying disability, you must notify me privately during the first week of classes. See the Syllabus Attachment for more information.
