

Fascinating Topics in Biology & Chemistry

A Lecture Series for UCSD Undergraduate Students

LIGNOCELLULOSIC CHEMISTRY: RENEWABLE BIOFUELS

Children are starving in India due to the mass production of corn ethanol. Learn how chemistry is enabling the production of green energy without malnourishing third world countries.

Speaker: Dr. Kim Albizati

Location: Solis 107

Date: Monday, 05/09/11 6:00-7:00 PM
